Anthony Vega

Senior Full Stack Software Engineer

tonynorte@gmail.com · +506 8721-2416 · Costa Rica · Open to remote (U.S. time zones)

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 14+ years of experience building and modernizing enterprise web applications for U.S. clients including T-Mobile, JPMorgan Chase, Reebok, and Merck. Strong across front end (React, Angular) and back end (Node.js, Java, C#/.NET), with hands-on cloud experience on AWS and Microsoft Azure, including event-driven integrations. Experienced in code reviews, estimations, and collaborating with distributed teams across the U.S., LATAM, and India. Early adopter of AI-assisted and agentic development workflows to improve team productivity.

TECHNICAL SKILLS

Front End	React, Angular (9+), JavaScript, TypeScript, HTML5, CSS3, component-based UI frameworks
Back End	Node.js, Java, C# / .NET, RESTful APIs, event-driven integrations, PHP
Cloud	Amazon Web Services: EC2, S3, RDS · Microsoft Azure: Logic Apps, API Connections (Office 365)
Data	SQL Server, Oracle, MySQL, PostgreSQL, ElasticSearch
DevOps & Tools	CI/CD pipelines, Git, SVN, Webpack, Gulp, Grunt, PowerShell
AI Tooling	Claude, GitHub Copilot, OpenAI APIs, agentic AI development workflows
Practices	OOP, design patterns, API contract design, Agile/Scrum, code reviews, estimation

PROFESSIONAL EXPERIENCE

Full Stack Developer | Babel

04/2026 – Present · Heredia, Costa Rica

- Develop scalable web applications and APIs with Node.js and React across the full lifecycle, from architecture to deployment, in an Agile environment.
- Designed and built an **event-driven notification service on Azure Logic Apps** for a digital-signature platform (PROCOMER): HTTP-triggered workflow with async 202 responses, event routing, and parallel email delivery to signers and viewers via the Office 365 connector.
- Defined the **JSON event contract** and backend integration patterns (post-commit publishing, retries with backoff, correlation IDs), working with SQL Server and an external signing service via callback/token validation.
- Implemented **fault-tolerant error handling** with Scopes and automated admin alerts, and validated all events and failure scenarios with PowerShell test scripts.
- Used **Claude** for AI-assisted development: workflow design, code generation, troubleshooting, and technical documentation.

Senior Software Engineer | 3Pillar Global

01/2022 – 03/2026 · Remote, supporting a U.S. client

- Developed end-to-end enterprise web applications using Angular, Java, and Node.js for a major U.S. platform.
- Implemented RESTful APIs and cloud integrations on AWS, using EC2, S3, and RDS for deployment and scalable infrastructure.
- Designed agentic AI-assisted development workflows with GitHub Copilot and OpenAI APIs to automate repository generation, service scaffolding, and documentation, improving team productivity and consistency.
- Participated in sprint planning, code reviews, and architectural discussions with cross-functional Agile/Scrum teams.

Senior Web Developer | Accenture

07/2012 – 12/2021 · Costa Rica

Enterprise projects for clients including T-Mobile, JPMorgan Chase, Reebok, and Merck, focused on front-end development and platform modernization of large-scale web applications.

- Contributed to architecture discussions, environment setup, and component-based development with React and Angular.
- Built reusable UI frameworks and internal tooling that improved delivery speed and team productivity.
- Participated in code reviews and estimations, collaborating with distributed teams in the U.S., LATAM, and India.
- Integrated ElasticSearch and REST APIs to deliver high-performance search and data-driven experiences.
- Managed CI/CD pipelines and build tooling (Webpack, Gulp, Grunt, Git, SVN).
- **Key project, COVID-19 Research Platform:** built a scientific search interface with ElasticSearch and Angular 9, enabling researchers to retrieve pandemic-related data quickly.

Analyst / Programmer | E.S.P.H.

2011 – 2012 · Costa Rica

- Developed web applications in Java and PHP; designed and managed MySQL and Oracle 10g databases.
- Took part in the full lifecycle: requirements analysis, planning, development, and documentation.

EDUCATION & CERTIFICATIONS

Bachelor's Degree in Systems Engineering | Universidad Nacional, Costa Rica · 2007 – 2011
C# / .NET Certification | Udemy · 2026
Spec-Driven Development with AI | Udemy · 2026

LANGUAGES

Spanish (native) · English (professional working proficiency)
